Culture of Safety

A 'culture of safety' describes the core values and behaviors that come about when there is a collective and continuous commitment by organizational leadership, managers, and workers to emphasize safety over competing goals.

Every employee has the right and responsibility to stop work in any situation where the safety of themselves or others is threatened.

Company Narrative

A recipient of the [Construction and Engineering Excellence Award](#) by Oracle, AMP United is nationally recognized as a leader in project management and is committed to a no excuses approach to key event & milestone accomplishment.

Regarding a milestone on one of our projects, a customer stated:

I held you up... and any other contractor would have written reports, attempted to charge thousands of dollars more, and still would not have met the milestone. Because it was AMP United, I knew you would get it done.

At AMP United, we know our **people are the difference makers** and are committed to their long-term growth.
